Ramy Chebaby – Hiring Manager

MINDFLARES

Demco Towers, Block A, 3rd floor, Antelias

Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer position at MINDFLARES. As a Computer Science student at Notre Dame University – Louaize (NDU), I am passionate about building innovative and impactful software solutions, and I believe my background aligns well with MINDFLARES' commitment to creativity and cutting-edge technology.

During my time at NDU and through my experience with Geek Express's AI engineering track, I have developed solid programming skills in Python, C++, HTML, and CSS. I designed an AI model capable of analyzing data and making predictions, and my performance earned distinction. Beyond academics, I have been actively involved in the NDU Computer Club and MUN logistics team, where I've enhanced my skills in teamwork, communication, and organization—all essential qualities for a collaborative engineering environment.

MINDFLARES' focus on crafting meaningful digital experiences resonates with my ambition to contribute to purpose-driven technology. I am eager to bring my technical foundation, adaptability, and enthusiasm to your team and grow through hands-on work in a professional setting.

I would welcome the opportunity to further discuss how I can support your mission at MINDFLARES. I am available for an interview at your convenience and can provide references or a portfolio upon request.

Thank you for considering my application. I look forward to the possibility of joining your innovative team.

Sincerely,

Alexandre Aoun
